

AtlantaGasLight.com/Safety

Dear students and parents

This activity book is designed to help teach you and your student about the importance of digging safely and calling **811** before starting any digging project.

This program has been established to help protect citizens from unintentionally damaging underground utility lines. When you dial **811**, local utility companies who have underground lines on or near your property, will be notified about your digging project and will mark their lines with paint and/or flags free of charge. This will help you understand where utility lines such as gas, power, phone and cable are located so you can dig safely around them. These lessons learned can help prevent service interruptions and potentially dangerous accidents by educating everyone on the importance of calling **811**.

Additional information is available at AtlantaGasLight.com or GA811.com.

We hope you enjoy completing the activities in this book and that they bring you one step closer to becoming a safe digging champion! We hope it will also serve as a reminder to always **Know What's Below**.

Call 811 Before You Dig.

Sincerely,

 **Atlanta Gas Light**

 **Atlanta Gas Light**

Color Code for Marking Underground Utility Lines

-  **Electric**
-  **Gas - Oil**

-  **Water**
-  **Irrigation**
-  **Sewer**
-  **Proposed Excavation**
-  **Temporary Survey**

Smell Gas? Call 877.427.4321

Learn what's underground!

Did you know that there are natural gas pipelines and other utility lines such as water, cable and electric running underground? Engineers build underground systems to deliver these services safely across the country to your home. Homes and businesses use natural gas for heating, cooking and powering their factories.

Activity

Connect the locations to bring natural gas, electricity, water and cable television to the home.

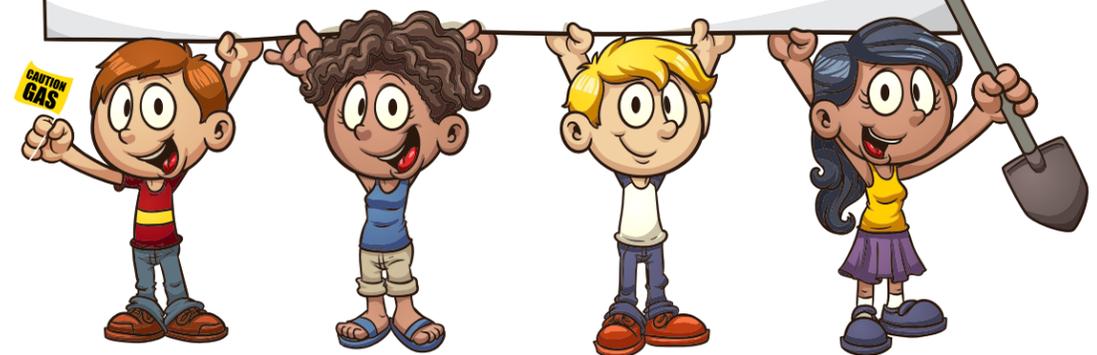

Congratulations!

You're a Safe Digging Champion!

Excavation work, including digging or excavating around a home or business, is the most common cause of natural gas emergencies. Before digging around your property, state law requires you call **811**, a statewide, toll-free number, to have your utility lines professionally marked.

Always dig with **C.A.R.E.** That means to **Call 811** before you dig, **Allow** the required time for free utility marking, **Respect** the marks and then **Excavate** carefully! Remember, damage prevention is a shared responsibility.

Dig With **C.A.R.E.**

- C** Call 811 before you dig.
- A** Allow required time for marking.
- R** Respect the marks.
- E** Excavate carefully.

Activity

Unscramble the words.

1. AFLG

2. AGS

3. TEXACVEA

4. SIPPE

5. TYAFSE

6. TLUIYTI

Ask an adult in your home to visit AtlantaGasLight.com/Safety to learn about damage prevention.

Learn about safe digging

Know what's below.
Contact before you dig.

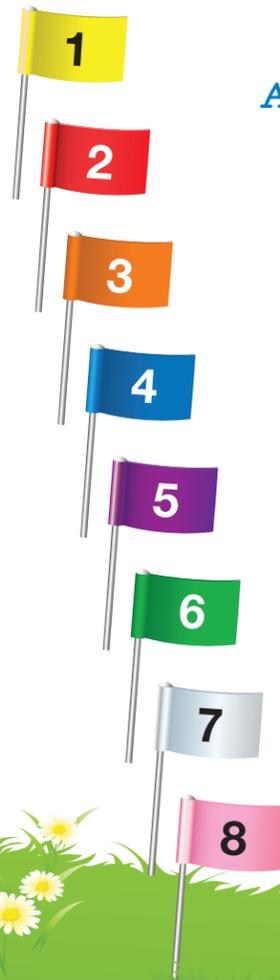

Now that you know natural gas pipelines live underground, you must be careful to avoid hitting these pipes when digging.

At Atlanta Gas Light, people's safety is our highest priority. When we are working near your home or our pipeline, we wear protective gear like safety vests and hard hats to stay safe and ensure we are easily recognizable. Always call **811** before beginning any digging project so we can make sure natural gas and other underground lines are easily recognizable to you.

When you call **811**, utilities place flags on their underground lines to tell you areas to avoid. Natural gas pipelines are marked with yellow flags. Can you identify the other types of flags?

Activity

Match the flags to the correct utility.

- A. Gas, oil, or petroleum
- B. Sewer
- C. Proposed excavation
- D. Reclaimed water, irrigation
- E. Potable water
- F. Electric
- G. Temporary survey
- H. Communications

Natural gas word search

Now that you have learned all about natural gas, there's one more challenge.

Activity

Find the hidden words from the list in the word search.

I know how my home uses natural gas

Natural gas pipelines connect to the meter at your house, which helps to control the flow of natural gas and measures how much your family uses. Pipes inside your home connect the natural gas meter to natural gas appliances like a water heater that warms up the water you use for baths, washing clothes and dishes; a stove that cooks your food; and a furnace that helps to heat your home when it's cold outside. Cars, trucks and buses can even use natural gas to run their engine!

Activity

Circle all the appliances in your house that use natural gas.

Damage prevention by the numbers

Did you know that each year more than 922,975 calls are made to **811** in AGL's service territory to have utilities properly marked to prevent damages while digging or excavating?

To avoid damaging any underground utility lines, homeowners should call **811** at least 3 working days (excluding weekends and legal holidays) before beginning any digging project. Homeowners can even submit a request online at **GA811.com** 24 hours a day, 7 days a week.

After your request is made, you must wait approximately 48 hours to allow time for marking. Once the utility lines are properly marked, you can begin your digging or excavation project carefully.

Activity

Use the information above and throughout this book to help you complete the Math Crossword Puzzle.

33	÷	^{A)}	=		10	×	^{B)}	=	
			+						
	×	4	=	^{C)}	^{D)}	+	^{F)}	=	28
			=			=			
	-	59	=	^{E)}					

Clues

- A. How many days in advance should you call **811** before starting a digging project?
- B. Number of different colored flags used to mark underground utilities before digging?
- C. Approximately how many hours should you wait for the utilities to be properly marked?
- D. How many steps in the C.A.R.E. message?
- E. How many letters are in the word SAFETY?
- F. How many hours a day can you submit an **811** ticket online?

Sniffy the Skunk says **Smell Gas?**

As a skunk, I certainly know about bad odors – like the rotten egg smell that is added to natural gas to help you know if there is a possible natural gas leak. When you smell the rotten egg odor of natural gas, you need to act fast! This means don't delay—get away!

Leave the area right away and tell an adult to call Atlanta Gas Light at **877.427.4321** or **911**.

- Don't look for the leak.
- Don't use or touch anything electrical, like flipping off light switches or turning off the TV.
- Don't even use a cell phone!

 **Activity**
Color in Sniffy the Skunk.

Picture yourself at Atlanta Gas Light

More than 1,100 people work hard each day to ensure Atlanta Gas Light delivers natural gas safely and reliably to our customers. It takes all kinds of jobs to run our company – including meter reading, mechanics, construction, engineering, customer service, accounting, technology and sales. There are lots of exciting careers at Atlanta Gas Light!
